- English – intermediate
- Russian – fluent, trying to forget it

ADDITIONAL INFORMATION

Telegram, WhatsApp, Phone: +380 96 122 57 61

Experience independently building complete websites from A to Z. I understand how to optimize code, files, and projects for Google PageSpeed. I do more than translate designs into browser-ready interfaces: I also have a strong sense of style and understand current trends.

This profession brings me satisfaction; once I start working, I become fully immersed in the process.

I am looking for a permanent OFFICE position with formal employment and career growth. I am also interested in remote work.

I understand how to work remotely and take it seriously. I have a webcam, high-speed internet, all the equipment needed for communication, a battery backup providing seven hours of power, and a powerful laptop. I live in an area where there were no power outages last year.

My current priorities are developing and applying: Node.js, ES6, Vue.js, React.js, React Native, TypeScript

Preferred working hours: 9:00 a.m.–5:00 p.m. (7 working hours)

PORTFOLIO

Personal project: my resume and portfolio are continuously evolving. I am currently working on a new version of the project whenever I have time.
